THANK YOU

I want to thank you for your trust on this asset, I'm sure you will like it very much. Remember to download the latest version of the pack in the first week of the month in order to get the latest added vehicles!

This pack used to be updated only with racing cars, but from June 1, 2021 I decided to add vehicles from different categories. **You can expect much more content in the near future**.

With nothing more to say at the moment, I appreciate your time reading this letter. Now let's create that game!.

PD: In order to change the color variation of the car, just change the material instance of the body from the inspector tab
